Once you become a Quicksilver owner, all you need do now is decide how much power you need.

Whether you choose Mariner, Mercury, Mercury MerCruiser or Mercury Diesel, each one offers its own range of distinct range of benefits. Talk to you dealer to find the right outboard or inboard power system for you.

Outboard Motors

4-stroke

Intake, compression, power, exhaust. The four stages of the four-cycle combustion. As every combustion series consists of four discrete stages, 4-stroke engines tend to be quieter, smoother and more fuel-efficient than traditional 2-strokes - all while producing lower emissions.

Verado® Supercharged

Before Verado®, conventional 4-stroke outboards were reliable, but disappointing on performance. The revolutionary Verado® 4-stroke changed that by combining unmatched acceleration and responsiveness, unbeatable torque, precise control and ultra quiet operation with industry-leading reliability.

OptiMax®

A Direct Injected engine that combines the heart, soul, speed and power of a traditional 2-stroke, but with the advantages of a 4-stroke. Its unique two-stage injection system creates a remarkably complete combustion - which means you can have a great time on the water while feeling good about conserving fuel and producing fewer emissions.

Inboard & Sterndrive engines

Sterndrive Engines

From the reliable performance of the MerCruiser 3.0 TKS/MPI to the stronger MerCruiser 4.3 MPI, you have all the power and value you're looking for:

- Optimised intake manifold for improved fuel atomisation and smoother power delivery.
- Revised fuel calibration for crisp acceleration and smooth running quality.
- Low restriction flame arrestor for added horsepower and torque.

- 3-year/300 hour maintenance interval on many periodic service items saves time and money.
- Helm-mounted Audio Warning System monitors for oil pressure, engine temperature and drive lube level - provides instant alarm if any of these vary from normal operating values.
- Available MerCathode® galvanic corrosion prevention system offers unmatched Active electronic corrosion protection.
- The Alpha® sterndrive delivers reliable performance in a value package.

Mercury Diesel

Combining the quiet, smooth performance of a traditional gasoline with the durability of a diesel, this four cylinder compact power-house features and advanced ECM with SmartCraft® compatibility to monitor various engine parameters. The QSD2.0 also features advanced components like the integrated heat exchanger and exhaust manifold, which also help reduce overall package size. Impressive acceleration and precise throttle response are the result of a 16 valve cylinder head and a proven common rail fuel system that includes a turbocharger and seawater aftercooler.

QUICKSILVER®

Retail Price List

Manufacturers delivery charge to dealer (UK Mainland) inc. VAT

FISH Series	£300
Boats up to 5.7 metres	£362
